Dataset
Main Method
Result Analysis
Water Chemistry Data with Parameters
Dataset Acquisition
Pre-Process
Data Pivoting
Exclude Unnecessary Rows
Merge All Datasets
Missing Value Handling
Parameter Selection
Outlier Handling
Input Dataset Preparation
WQI Model Implementation
(CCME, WAWQI, DWQI)
- Parameter Selection
- Sub-index
- Aggregation Function
- WQI Calculation
- WQI Classification
WQI Value
Machine Learning Model for Prediction and Forecasting
Criterias
Metrics: Reg: MAE, MSE, RMSE, R square, MAPE Loss
Class: Acc, Precision, Recall and F1 Score
Curves: Acc-Loss, ROC
Plots: Actual and Predicted
XAI: LIME, SHAP
Comparison: Existing Baselines
Data Sources
Data Process
WQI Model Implementation
Model Development
Visualization and Assessments
